

LOH JING YI

COMPUTER SCIENCE UNDERGRADUATE

016-7682007 | xxjingyixx@gmail.com | [linkedin.com/in/jing-yi-loh](https://www.linkedin.com/in/jing-yi-loh) | github.com/Jingyi-007
Seeking internship: Nov 2026 – Feb 2027

Final Year Computer Science student (Data Science major) passionate about data analytics, artificial intelligence, and technology-driven problem solving, with hands-on experience across database design, web-based data visualization, and machine learning. An independent, fast learner who adapts quickly to new tools and environments, and collaborates effectively in team settings, such as coordinating publicity strategy within a student committee. Committed to continuous learning and professional growth, and currently seeking an internship to grow technically, deepen my skills, and gain hands-on industry experience across data, AI, and software engineering.

EDUCATION

Feb 2025 - Nov 2027 (Expected)

Bachelor of Computer Science in Data Science

- Monash University Malaysia
- CGPA : 3.849/4.00 WAM: 81.133/100

PROJECTS EXPERIENCE

Clear Away Database Design | Oracle Data Modeler, SQL

April 2026 – May 2026

- Designed a full conceptual ERD (Crow's Foot notation) for a waste-collection business, modelling entities, relationships, and cardinality from a real-world case study
- Built a logical data model in Oracle Data Modeler and generated a working SQL schema with constraints, check clauses, and documented business rules
- Used Git for version-controlled, staged development (entities → relationships → attributes)

Beyond the 95%: The Learning Divide | HTML, CSS, JavaScript, Vega-Lite

April 2026 – May 2026

- Live: jingyi-007.github.io/FIT2179-DataVis2
- Designed and built an interactive data-story website analyzing literacy and education access disparities across Malaysian states, deployed on GitHub Pages
- Built choropleth maps and linked interactive filters (dropdown, slider) allowing users to explore school density, enrolment, and completion rates by state and year
- Synthesized data from Kaggle and OpenDOSM (Malaysia's open data portal) to uncover a gender and urban-rural "learning divide" despite 95% national literacy

Malaysia Internet & Social Media Analytics Dashboard | Tableau

March 2026 – April 2026

- Live: public.tableau.com/app/profile/jing.yi.loh/viz/Assignment1_v1_draft/Dashboard1
- Cleaned and combined internet-usage and social-media datasets from Our World in Data and Kaggle
- Built an interactive Tableau dashboard to analyze Malaysia's internet adoption and social media growth.
- Created interactive visualizations to compare internet penetration across Southeast Asia and global markets.
- Revealed that Malaysia leads the SEA region with nearly 97% internet penetration and ranks #1 in the region.

Student Performance Prediction | Python, Pandas, Jupyter Notebook

July 2025 – Aug 2025

- Cleaned and preprocessed a student dataset through missing-value treatment and feature scaling (StandardScaler), then split into train/test sets (70/30, stratified)
- Performed EDA (correlation analysis, distribution plots) to uncover key factors influencing academic performance, e.g. study time and absences vs. GPA
- Trained and compared SVM, Decision Tree, and Random Forest classifiers for multi-class grade prediction, achieving up to 75% accuracy with SVM (RBF kernel)
- Applied k-means clustering to demonstrate working knowledge of unsupervised learning techniques
- Identified study time and absenteeism as the strongest predictors of academic risk, suggesting a model like this could support early intervention for at-risk students

LEADERSHIPS EXPERIENCE

Publicity Executive | Robogals Monash Malaysia

July 2026 - Present

- Collaborated within a cross-disciplinary committee of engineering and science students, creating promotional content for social media and event campaigns to spread STEM awareness
- Worked alongside members from varied academic backgrounds to plan and execute publicity strategies for workshops and outreach activities

Volunteer, Interview Room Coordinator | MIND ENGINE Expo 2026

Aug 2026

- Coordinated interview scheduling for a university-wide career fair organized by students, guiding interviewers and interviewees to booked rooms and tracking session timing across two venues
- Acted as a communication bridge between company representatives and the event committee, relaying real-time updates on room bookings and schedule changes

SKILLS

- **Programming Languages:** Python, SQL, HTML, CSS, R, Shell (Bash)
- **Tools & Frameworks:** GitHub, GitLab, Oracle Data Modeler, Pandas, Scikit-learn
- **Data Visualization:** Tableau
- **Languages:** English, Mandarin, Malay
- **Soft Skills:** Communication, Teamwork, Time Management, Leadership
